

RAPIDIDENTITY: Overcome Higher Ed's Unique Identity Challenges

With complex user populations, non-hierarchical structures, dynamic partnerships, and an array of compliance regulations, Higher Education faces unique identity and access management (IAM) challenges that most solutions simply were not designed to address. Identity Automation takes an identity lifecycle approach to cybersecurity, empowering colleges and universities to address these challenges with RapidIdentity, our comprehensive IAM platform.

RapidIdentity was purpose-built to provide the security, data privacy, and adaptability necessary for higher education institutions to excel in their mission. RapidIdentity enables colleges and universities to automate the full identity lifecycle of all users, while delivering a superior user experience for students, staff, and faculty.

STREAMLINED MULTIPLE AFFILIATIONS

From students that are staff to faculty that are students— users at colleges and universities frequently have multiple affiliations, which all too often results in data synchronization issues and increased password resets and support calls. RapidIdentity overcomes these challenges by detecting users with multiple affiliations and merging them into a single account.

IDENTITY MANAGEMENT AT SCALE

Higher Ed IT departments onboard and off-board thousands of users at once. When managed with scripts and manual processes, this quickly becomes a time-consuming headache. RapidIdentity automates the full user lifecycle— for not only just students and staff, but vendors, contractors, and external partners— increasing efficiency and productivity.

SECURITY AND COMPLIANCE

Cyber attacks are on the rise in Higher Ed. At the same time, universities and colleges must comply with evolving regulations, such as FERPA and GDPR. Putting RapidIdentity at the core of security helps Higher Education rise to these challenges with secure access controls, automated provisioning/deprovisioning, and MFA for a large number of users and devices.

The RapidIdentity platform offers comprehensive IAM capabilities designed to address the unique needs of higher education institutions.

LIFECYCLE

- Automated Provisioning and Deprovisioning
- Sponsorship for Non-Employee Populations
- Granular Group Management
- Delegated Administration and End-User Self-Service
- Dynamic Role Management
- Enterprise-Ready Integrations

GOVERNANCE

- Orphaned Account Detecton
- Access Management
- Complex SOD Policy Handling
- API Password Management
- Shared and Emergency Privileged Accounts
- Audit Logging and Reporting

AUTHENTICATION MFA and SSO

- Secure Remote Access and VPN Logins
- Easily Connect to Virtual Environments
- Adaptive Multi-Factor Authentication
- Strong Authentication for Windows Clients and Shared Workstations
- Configurable Single Sign-On
- User-Friendly Self-Service Capabilities
- Mobile Support

DEPLOYMENT METHODS

RapidIdentity is available on-premise or in the cloud, with no sacrifices in functionality, features, or security.

- On-Premise: Software Appliance
- Cloud: Private instance in shared infrastructure
