

## RAPIDIDENTITY: The Leader in IAM for K-12 Educators

Identity Automation helps K-12 school districts secure their staff, students, and parents with an identity lifecycle approach to cybersecurity. With over ten years experience and hundreds of K-12 installations, Identity Automation is a trusted partner to school districts of all sizes— easily scaling from 1,000 to 10 million users—helping districts to enable digital learning and protect student data, without increasing staff resources.

Our RapidIdentity platform automates and streamlines the identity and access management (IAM) of all users throughout their entire academic lifecycle, so IT staff can focus on strategic initiatives, not tedious tasks.

### LIFECYCLE MANAGEMENT FOR ALL USERS

Creating and supporting thousands of student, teacher, staff, contractor, and parent user accounts is not practical or manageable with scripts and manual processes. RapidIdentity automates account creation, changes, and deletion—at scale, seamlessly keeping Active Directory and downstream systems accurate and up-to-date.

### ENHANCED USER EXPERIENCE

Ensuring students and teachers have timely and accurate access to the latest online resources is crucial to collaborative learning environments. RapidIdentity streamlines access and boosts productivity with capabilities, such as Single Sign-On, kid-friendly authentication, and self-service and delegated password reset functionality.

### SEAMLESS CLASS ROSTER DELIVERY

Integrating LMS and digital textbooks with SIS and keeping them up-to-date can be incredibly time-consuming and error-prone. RapidIdentity Rostering completely automates the process of integrating and synchronizing student roster data with target applications, giving students immediate access to class resources.

The RapidIdentity platform offers comprehensive IAM capabilities designed to address the unique needs of school districts.

---

## LIFECYCLE

- Automated Provisioning and Deprovisioning
- Sponsorship for Non-Employee Populations
- Granular Group Management
- Delegated Administration and End-User Self-Service
- Dynamic Role Management
- Enterprise-Ready Integrations

---

## GOVERNANCE

- Access Management
- Complex SOD Policy Handling
- API Password Management
- Shared and Emergency Privileged Accounts
- Audit Logging and Reporting

---

## AUTHENTICATION MFA and SSO

- Secure Remote Access and VPN Logins
- Easily Connect to Virtual Environments
- Adaptive Multi-Factor Authentication
- Kid-Friendly Authentication
- Configurable Single Sign-On
- User-Friendly Self-Service Capabilities
- Mobile Support

---

## ROSTERING

- Catalog of Predefined Application Integrations
- Data Privacy Compliance with FERPA/COPPA
- Support for IMS Global OneRoster™ Standard
- Support for Custom Delimited File Formats
- Flexible Data Derivation & Data Filtering UI

---

## DEPLOYMENT METHODS

RapidIdentity is available on-premise or in the cloud, with no sacrifices in functionality, features, or security.

- On-premise: Software Appliance
- Cloud: Private instance in shared infrastructure
