

RapidIdentity for K-12 Education

While technology is now embedded in nearly every facet of K-12 education, often the systems students and educators use each day don't interact, leading to inefficient workflows and lost productivity. RapidIdentity is an Identity and Access Management (IAM) platform that was purpose-built to help educators solve this challenge.

RapidIdentity puts the digital identities of students and educators at the heart of the learning process with capabilities, such as identity lifecycle management, engagement analytics, single sign-on, rostering, and more. By connecting applications and data, RapidIdentity enables school districts to keep people and assets safe, automate and personalize workflows, and provide operational insights.

Lifecycle Management For All Users

Creating and supporting thousands of student, teacher, staff, contractor, and parent user accounts is not practical or manageable with scripts and manual processes. RapidIdentity automates account creation, changes, and deletion—at scale, seamlessly keeping Active Directory and downstream systems accurate and up-to-date.

Enhanced Student Experience

Ensuring students and educators have timely and accurate access to the latest online resources is crucial to collaborative learning. RapidIdentity streamlines access and boosts productivity with capabilities, such as single sign-on, kid-friendly authentication, and self-service and delegated password reset functionality.

Seamless Class Roster Delivery

Integrating LMS and digital instructional content with SIS and keeping them up-to-date can be incredibly time-consuming and error-prone. RapidIdentity Rostering completely automates the process of integrating and synchronizing student roster data with target applications, giving students immediate access to class resources.

The RapidIdentity platform offers comprehensive IAM capabilities designed to improve educational workflows.

LIFECYCLE

- Automated Provisioning and Deprovisioning
- Sponsorship for Non-Employee Populations
- Granular Group Management
- Delegated Administration and End-User Self-Service
- Dynamic Role Management
- Enterprise-Ready Integrations

**AUTHENTICATION
MFA and SSO**

- Configurable Single Sign-On
- Kid-Friendly Authentication
- Multi-Factor Authentication for Windows Login
- User-friendly Self-Service Capabilities
- Support for Duo Authentication
- Mobile Support
- Secure Remote Access and VPN Logins
- Strong Authentication for Windows Clients and Shared Workstations

GOVERNANCE

- Access Management
- Complex SOD Policy Handling
- API Password Management
- Shared and Emergency Privileged Accounts
- Audit Logging and Reporting

ROSTERING

- Catalog of Predefined Application Integrations
- Compliance with FERPA, COPPA, SOPPA and California-Specific Student Privacy Laws
- Support for IMS Global OneRoster™ Standard
- Support for Custom Delimited File Formats
- Flexible Data Derivation & Data Filtering UI

**DEPLOYMENT
METHODS**

RapidIdentity is available on-premise or in the cloud, with no sacrifices in functionality, features, or security.

- On-premise: Software Appliance
- Cloud: Private instance in shared infrastructure

**IDENTITY
AUTOMATION**
