RapidIdentity: IAM Trusted by Over 500 Agencies

Increasing cyberattacks, stringent compliance regulations, and a growing number of users—there’s more pressure than ever on government agencies to lock down unauthorized access to sensitive systems and data. Furthermore, this must be done amid tight budget constraints where more must be accomplished with less.

RapidIdentity is a complete identity and access management (IAM) platform, designed to enable government agencies and the contractors that work with them to increase security, streamline access to critical systems, and manage all user identities. With 7 out of the 10 largest CJIS deployments in the United States, RapidIdentity is the market leader for CJIS advanced authentication and offers 15 multi-factor authentication (MFA) methods to give agencies the flexibility they need to protect all systems and access entry points.

Flexible Multi-Factor Authentication
Users today access government systems and data from a wide range of physical, remote, and digital entry points. With a broad range of authentication methods, including smartcards and biometrics, RapidIdentity delivers the flexibility to meet technology requirements and protect all access entry points—including legacy systems.

Achieve Compliance Requirements
From federal down to state and local levels, government agencies must comply with numerous, evolving compliance regulations, such as CJIS and DFARS. RapidIdentity helps government agencies ensure they are audit-ready with CJIS-compliant advanced authentication, access certification campaigns, and robust audit and reporting functionality.

Lifecycle Management for All Users
A range of employees, contractors, and citizens need access to government systems and services. Ensuring only authorized users have the right access is no small task. RapidIdentity Lifecycle automates the full identity lifecycle—from provisioning to deprovisioning—for all users, even external users who do not exist in authoritative systems.
The RapidIdentity platform offers comprehensive IAM capabilities designed to address the unique needs of your public service organization.

### LIFECYCLE
- Automated Provisioning and Deprovisioning
- Sponsorship for Non-Employee Populations
- Granular Group Management
- Delegated Administration and End-User Self-Service
- Dynamic Role Management
- Enterprise-Ready Integrations

### AUTHENTICATION
**MFA and SSO**
- Secure Remote Access and VPN Logins
- Easily Connect to Virtual Environments
- Multi-Factor Authentication for Windows Login
- Adaptive Multi-Factor Authentication
- Support for DUO Authentication
- Strong Authentication for Windows Clients & Shared Workstations
- Configurable Single Sign-On
- User-Friendly Self-Service Capabilities
- Mobile Support

### GOVERNANCE
- Access Management
- Complex SOD Policy Handling
- API Password Management
- Shared and Emergency Privileged Accounts
- Audit Logging and Reporting

### DEPLOYMENT METHODS
RapidIdentity is available on-premise or in the cloud, with no sacrifices in functionality, features, or security.
- On-premise: Software Appliance
- Cloud: Private instance in shared infrastructure
