

# RAPIDIDENTITY MFA AND RAPIDIDENTITY eSSO FOR HEALTHCARE

IDENTITY  
AUTOMATION

## STRONG AUTHENTICATION TAILORED TO THE WAY YOU WORK

The rapid transition from a paper-based healthcare environment to an environment where everything exists online has forced healthcare to change the way it conducts business. Increased regulatory demands, coupled with financial incentives, have forced constant change in this new environment. Our healthcare solution is designed to embrace this ever-changing environment, while at the same time, keeping your clinical systems secure and your providers happy. Additionally, it is designed to be turn-key and includes software, hardware, professional services, and support.

“Our strategy is to enhance clinical workflow performance by providing the highest quality software, broad-based hardware support, and expert-level services - all at a competitive price.”

### AN ENHANCED CLINICAL WORKFLOW SOLUTION

RapidIdentity MFA and RapidIdentity eSSO were designed to provide clinical workflow performance enhancements. Access to critical patient information is streamlined by reducing the amount of time providers spend logging into systems and applications. In an age where healthcare IT workers are being pulled in opposing directions, RapidIdentity strikes the perfect balance between convenience and security.

#### 1. SELECT

Select the best authentication method for your organization or mix-and-match multiple methods. RapidIdentity MFA supports nine different methods of authentication. In healthcare, we find the highest level of provider satisfaction is achieved by using proximity cards, that are also used for building access or with fingerprint biometrics.

#### 2. DEPLOY RAPIDIDENTITY

RapidIdentity MFA and RapidIdentity eSSO are commonly deployed in less than a week at large organizations and in days at small to medium-sized organizations. Our team of experts can assist you in every step of the deployment process.

### 3. ENJOY THE BENEFITS

With RapidIdentity MFA and RapidIdentity eSSO in place, your providers will be happier with convenient access to critical patient information, your administrators will enjoy simplified management, and your executives will be delighted with increased security and profitability.

### PROVEN BENEFITS FOR HEALTHCARE PROVIDERS

You will be happy to learn there is an authentication solution on the market that is easy to understand, deploy, use, and maintain. RapidIdentity MFA and RapidIdentity eSSO are also convenient, cost-effective, and enhance the manner-in-which providers interact with applications.

Scalable and flexible, our solution has been proven from small installations of a few dozen users, to very large deployments of over one hundred thousand users, with minimal impact to network speed and increased provider satisfaction.

You can start saving 15 minutes per healthcare provider today and recognizing a return on your investment in less than one month!
