## Clever IDM Enterprise by RapidIdentity

At Clever and Identity Automation, we're passionate about ensuring the entire education community can safely engage in digital learning. That's why we are working together to deliver an integrated identity management solution that delivers the online safety everyone deserves, while maximizing instructional time.

Clever IDM Enterprise is a comprehensive Identity Management solution, integrated with Clever. By providing automated account provisioning and lifecycle management with Active Directory, Microsoft 365 and G Suite, Clever IDM Enterprise helps school districts address their critical interoperability and authentication challenges.

### **Automate Manual Processes**

Give students fast access to the resources they need, while reducing demands on overtaxed IT departments by eliminating delays and errors stemming from manual account creation. Clever IDM Enterprise automatically updates user logins throughout district systems, ensuring users have access on day one and throughout the school year.

### **Data Security and Privacy**

As digital learning increases, so do the risks. Clever IDM Enterprise protects student data and mitigates the risk of a data breach by automatically enforcing security policies across each application, protecting sensitive data, and closing security gaps from old user credentials and access rights.

### **Time and Cost Savings**

Clever's digital learning platform (including SSO, rostering, messaging, and analytics) is always free for districts. This enables districts to add-on Clever IDM Enterprise, covering all of their identity management needs for a fraction of the price of other solutions. For districts who are rostered with Clever, onboarding Clever IDM Enterprise can be done in days, not months.

Clever IDM Enterprise improves IT efficiency and security, at a fraction of the cost, with robust identity lifecycle management capabilities.

#### **AUTOMATED PROVISIONING AND DEPROVISIONING**

Fully automate identity creation at scale and ensure user accounts are managed throughout their lifecycle.

#### **SPONSORSHIP FOR THIRD-PARTY POPULATIONS**

Provide the same level of identity lifecycle management for contractors, partners, and other external users who don't exist in your authoritative system.

#### **GRANULAR GROUP MANAGEMENT**

Remove the burden of manually managing group access with support for static and dynamic group assignments, inclusions and exclusions filtering, and nested group memberships.

#### **DELEGATED ADMINISTRATION AND END-USER SELF-SERVICE**

Enable users to reset their own passwords and IT admin to unlock accounts and reset passwords.

#### **DYNAMIC ROLE MANAGEMENT**

Automatically place users in the correct groups and distribution lists, using role- and attribute-based provisioning policies to add and remove access rights.

#### **INSTITUTION-READY INTEGRATIONS**

Connect SIS identity data for students and teachers via Clever and HR identity data for Staff via a simple CSV file. These identities can then be instantly synced and managed in Active Directory, Microsoft 365, and G Suite.
