RapidIdentity Rostering

Everyone wants curriculum delivery platforms in the classroom, but integrating digital learning resources with SIS platforms can be a time-consuming and error-prone struggle that leaves teachers frustrated and students without access to the resources they need to succeed.

RapidIdentity Rostering is a SaaS integration service that automates the process of integrating and synchronizing student roster data with target applications, giving students immediate access to class resources and ensuring a richer curriculum delivery. Leave the process of integrating and maintaining class rosters with digital learning resources to RapidIdentity.

Accelerate
Digital Learning

Effortlessly sync the class roster data needed to optimize collaboration and the learning experience. Rostering data is provided to third-party vendors immediately and stays up-to-date throughout the semester—so students and educators always have access to the right digital textbooks and resources they need to succeed.

Protect
Student Data

RapidIdentity Rostering is an identity-driven approach to automated rostering that is purpose-built with security in mind. By providing a granular level of control, the data elements that are shared with third-party applications can be specified, protecting PPI and reducing an academic institution's liability.

Reduce
IT Burden

RapidIdentity Rostering frees up IT teams to focus on more strategic initiatives by automating the process of integrating and synchronizing student roster data with target applications. RapidIdentity Rostering provides timely, reliable sharing and bidirectional syncing with third-party online educational resources.

RapidIdentity Rostering is designed to address the unique needs of academic institutions with features including:

CATALOG OF PREDEFINED APPLICATION INTEGRATIONS
Choose SIS, LMS, digital textbook, and other instructional applications from Identity Automation's catalog of predefined rostering integrations. Simply provide the related information, and let the system do the rest.

DATA PRIVACY COMPLIANCE
The RapidIdentity Rostering platform is hosted in Amazon Web Services and compliant with the following: FERPA, COPPA, SOPPA, and California-specific student privacy laws.

SUPPORT FOR IMS GLOBAL ONE ROSTER™ STANDARD
Identity Automation's OneRoster consumer and provider capabilities enable integration with over 300 OneRoster certified applications.

SUPPORT FOR CUSTOM DELIMITED FILE FORMATS
Unlike other rostering solutions, RapidIdentity Rostering supports custom file formats for both provider and consumer applications, enabling districts to automate rostering with a broad range of educational application providers.

FLEXIBLE DATA DERIVATION AND DATA FILTERING UI
Leverage RapidIdentity's "Metaverse" to collect and stage roster data for custom outputs to consumer and provider systems through Flat Files and API's using a flexible data derivation and data filtering UI.

IDENTITY AUTOMATION
