

# HealthCast EPCS

SECURE E-PRESCRIPTION WORKFLOWS  
WITH DEA-COMPLIANT AUTHENTICATION  
INTO EMR APPLICATIONS.

HealthCast EPCS is a frictionless, DEA-compliant Multi-Factor Authentication (MFA) solution for securing electronic prescription of controlled substances (EPCS) workflows. Designed with efficiency in mind, HealthCast EPCS increases patient safety and improves clinician productivity by quickly and securely verifying clinician identities when placing prescription orders.

## FRictionless MULTI-FACTOR AUTHENTICATION

Verify clinician identities using flexible MFA methods, including biometrics, push notifications, and OTP tokens.

## DIRECT PRESCRIPTION DELIVERY

Securely send medication orders directly to the pharmacy, reducing the risk of prescription tampering.

## EMR INTEGRATION

Streamline clinician workflows with direct EMR integration that provides a seamless non-intrusive experience.

## ACCESS CONTROLS

Set access controls that ensure proper process is in place for giving EPCS permissions to approved providers.

## AUDIT AND REPORTING

Establish an audit trail that supports the ability to demonstrate end-to-end compliance with EPCS regulations.

## SUPERVISED CREDENTIAL ENROLLMENT

Facilitate the process of enrolling credentials and aligning with MFA modalities after identity-proofing.

### **STRENGTHEN PRESCRIPTION SECURITY**

Eliminate the risk of hand-written prescriptions being stolen, altered, or forged by sending electronic orders directly to the pharmacy. HealthCast EPCS secures these workflows with a variety of DEA-compliant, MFA options for verifying clinician identities, including biometrics, push notifications, and OTP tokens.

### **INCREASE CLINICIAN PRODUCTIVITY**

Manually refilling prescriptions, reconciling medication lists, deciphering handwriting, and rectifying errors detracts from clinician productivity. Through direct EMR integration with e-prescribing workflows, our EPCS solution secures the process, while giving clinicians a single, streamlined workflow for all medications.

### **IMPROVE PATIENT SAFETY & CONVENIENCE**

HealthCast EPCS supports efforts to take the guesswork out of filling prescriptions and ensures patients receive the correct medication by securing access to e-prescribing workflows. Plus, by sending prescriptions orders directly to a patient's pharmacy the experience is quicker and more convenient for patients.
