RAPIDIDENTITY MFA AND RAPIDIDENTITY eSSO FOR CJIS COMPLIANCE

THREE STEPS TO DEPLOYING CJIS COMPLIANT ADVANCED AUTHENTICATION

1. SELECT THE AUTHENTICATION TECHNOLOGY THAT WORKS BEST FOR YOUR ORGANIZATION

RapidIdentity supports six forms of advanced authentication methods as defined within the CJIS Security Policy. The solution is capable of supporting dozens of workflows while providing the highest level of flexibility and ensuring full compliance and user satisfaction.

Need a low-cost option? Risk-based authentication is a popular tokenless choice. Want to leverage existing hardware investments? Consider using the embedded fingerprint or card readers in laptops, or leverage an existing magnetic stripe reader connected to your mobile units.

Looking for an easy-to-use solution for the officers? Maybe opt for using an existing building access badge for tap in-and-out convenience. Concerned about having the highest level of security? Implementing digital certificates with contact smart cards or tokens can be a great solution.

With deep experience in all kinds of authentication, Identity Automation will help you select the best fit for your agency today and keep you future-proofed as the CJIS Security Policy evolves.
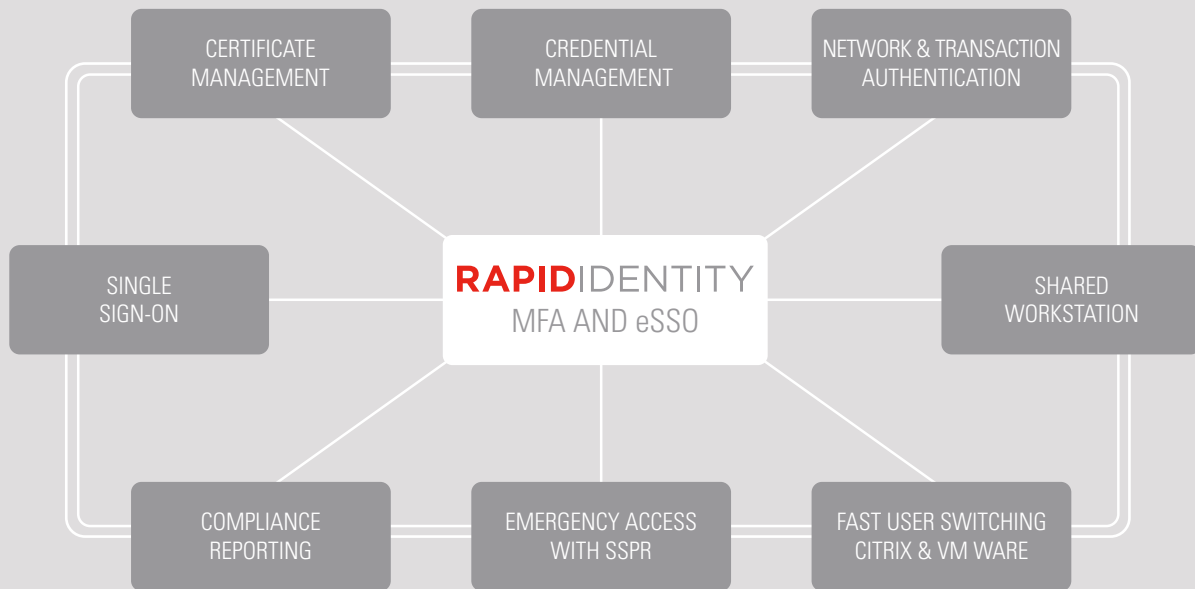

2. INSTALL AND DEPLOY RAPIDIDENTITY

With no additional appliances or servers to purchase, RapidIdentity MFA and RapidIdentity eSSO are installed, configured, and running in a matter of hours. Automated processes tie in to existing infrastructure, like Active Directory and mobile VPNs, minimizing the effort required to get started. Authentication method selection, desired policies, and system preferences are straightforward settings in an easy-to navigate web interface. Client installation can be pushed out with standard desktop publishing tools. In the event your agency has specific environmental requirements, our engineers are ready to walk you through the process to make sure the experience is a smooth one.

3. ENROLL USERS

Enroll once. Authenticate anywhere. The user enrolls in the system one-time, on one machine, and then can roam to any machine, including mobile units. Cases such as forgotten cards or forgotten PINs are handled automatically through easy to understand self-service processes.

KEY FEATURES OF RAPIDIDENTITY MFA AND RAPIDIDENTITY eSSO

CERTIFICATE MANAGEMENT

CREDENTIAL MANAGEMENT

NETWORK & TRANSACTION AUTHENTICATION

SINGLE SIGN-ON

RAPIDIDENTITY
MFA AND eSSO

SHARED WORKSTATION

COMPLIANCE REPORTING

EMERGENCY ACCESS WITH SSPR

FAST USER SWITCHING CITRIX & VM WARE

PASSWORD REDUCTION AND ELIMINATION • PROXIMITY CARD AUTHENTICATION • SMART CARD AUTHENTICATION WITH PKI

KNOWLEDGE-BASED AUTHENTICATION • TRANSACTION-BASED AUTHENTICATION • TWO-FACTOR REDUCED SIGN-ON

SELF-SERVICE PASSWORD RESET • ADVANCED AUDITING AND LOGGING • SMOOTH ROAMING BETWEEN SYSTEMS

ENHANCED SECURITY FOR KIOSKS • ENABLES ENCRYPTION AND DIGITAL SIGNATURES • AUTO DESKTOP LOCKING

FAST-USER SWITCHING & CITRIX® HOT DESKTOP • FUNCTIONALITY ON WINDOWS 8, 10 AND MAC

CONCERNED ABOUT KEEPING UP WITH FUTURE CJIS SECURITY REQUIREMENTS?

RapidIdentity is the only solution that protects you from a rip-and-replace scenario. We offer the only complete authentication solution that protects your agency today and in the future. Call us today for a full demonstration and see the benefits for yourself.
- RFID CARDS, FOBS, TAGS, AND NFC ENABLED SMART PHONES
- SMART CARDS AND USB TOKENS WITH PKI
- BIOMETRICS (FINGERPRINT)
- MAGNETIC STRIPE (AGENCY ISSUED ID CARD OR DRIVER'S LICENSE)
- RISK-BASED AUTHENTICATION (TOKENLESS)
- ONE-TIME PASSWORD TOKENS AND CARD
- PUSH AUTHENTICATION ON MOBILE DEVICES
