

The Smartest Way to Streamline Your Identity & Access Management

Identity Automation's sophisticated, easy-to-use RapidIdentity software maximizes business agility and productivity by making every user a power user, simply and securely.

IDENTITY
AUTOMATION

Our Story

Since our founding in 2004, Identity Automation has focused on intelligently automating provisioning, access, and account management. It's our mission to securely put control of these crucial tools in the hands of the users who need it most — employees and managers.

At the heart of every organization, managing complex systems for multiple users and granting secure access to the right people at the right time is paramount. But it's often difficult, which can lead to IT bottlenecks and productivity drains or, worse, severe lapses in security and data privacy.

We developed RapidIdentity to make identity management so efficient that it's practically invisible. It just works: seamlessly, securely, and effortlessly, all the time.

What We Do

Our advanced, user-friendly RapidIdentity software securely streamlines all identity and access management, freeing IT resources to pursue strategic opportunities and boosting productivity across the board.

Empower People in Every Role

From employees and managers, to partners and vendors, to IT, RapidIdentity simply and securely empowers users in every role, improving their capabilities, facilitating access to exactly what they need and allowing organizations to move with greater speed and agility.

Automated Provisioning

RapidIdentity handles provisioning, de-provisioning and real-time access updates automatically and securely, dictated by changes in your seamlessly connected systems.

End-User Self-Service

Allow end-users to manage their own accounts and set and reset passwords according to unique organizational policies, without the need for IT help desk support.

Secure Single Sign-on

Boost productivity with single sign-on access to every on-premises or cloud-based system, and enhance security with multi-factor authentication across all applications.

Identity Governance & Compliance

Grant your IT department and managers clear insight into which employees have what access, and ensure security through time-based certification, sponsorship, and re-attestation.

On-Premises or in the Cloud

RapidIdentity is adaptable to any organization's unique needs. It is available on-premises or in the cloud as a managed service, with no sacrifices in functionality, features, or security.

Unleash the power of your employees, simply and securely.

1. Increased productivity across your organization.

RapidIdentity's powerful delegation and sponsorship functionality combines with automated provisioning and workflow to empower employees and external users, streamline identity and access management for managers, and free up precious IT resources, all while enhancing security.

2. Rapid, hassle-free deployment

RapidIdentity's sophisticated Logic Engine and powerful toolkit enable organizations to integrate their systems faster than any other fully featured identity management solution. Earn a return on your investment quickly and dramatically reduce total cost of ownership — even before factoring in time savings and productivity gains.

3. Easy-to-use toolkit for seamless connections.

RapidIdentity connects to most applications easily with minimal configuration. The system's Logic Engine and toolkit give your IT team easy-to-use tools to connect and integrate with different systems, all without requiring a central repository — no developers or custom programming required.

4. Simple, secure, automated scalability.

RapidIdentity ensures high availability and speed even at massive scale, no matter how many users you have — thousands, hundreds of thousands, or millions. Identity Automation boasts multiple successful real-world individual deployments of over 250,000 end users, as well as the largest-ever cloud deployment, provisioning up to eight million users.

5. Unsurpassed service & commitment to your success.

Identity Automation's best-in-class support team is there to ensure that you get the most from your RapidIdentity installation, including options for 24/7 support, online access to a compendium of articles and on-demand training videos, a helpful user forum to keep in touch with the knowledgeable Identity Automation community, comprehensive product documentation, and an exclusive online support channel.

Our highly trained Solution Architects are available to recognize, understand, and respond to your organization's unique needs — and empower your team to address them with minimal disruption.
