RapidIdentity Authentication

Today's students and educators access an ever-growing number of cloud-based applications from a variety of devices. RapidIdentity Authentication streamlines that process and ensures seamless user access, while protecting all entry points.

RapidIdentity Authentication helps organizations boost productivity with secure, Single Sign-On (SSO) to on-premise and cloud-based systems, while enhancing security with robust Multi-Factor Authentication (MFA) that adds an extra layer of protection or can even replace passwords altogether. RapidIdentity Authentication supports a broad range of authentication methods, including the latest frictionless smartphone-based technologies and risk-based authentication. With RapidIdentity, faculty and students are more productive, and everyone is safe and sound.

**Enhance Student Experience**

Put an end to password-related support calls and remove distractions to learning with secure Single Sign-On (SSO). All resources reside in a single portal that provides personalized, one-click access to the applications and systems students and educators need.

**Simplify & Secure the Login Process**

Provide all your users groups, including young students, easy access to resources with a variety of password-less and student-friendly authentication methods, including smartphone-based push notifications, QR code badges, pictograph authentication, and more.

**Cybersecurity Insurance Requirements**

Increase security to address regulations that require strong authentication, while streamlining log-in processes. RapidIdentity Authentication enables academic institutions to sustain an insurable technology infrastructure and lower cybersecurity insurance premiums.
RapidIdentity Authentication is designed to address the unique needs of your academic institution with features including:

**CONFIGURABLE SINGLE SIGN-ON**
Provide users with one-click access to thousands of cloud-based and on-premises applications and services with the ability to hide, remove, and organize quick-launch icons. Integration options: SAML 2.0, OAuth, OpenID Connect, and Form Fill.

**USER-FRIENDLY SELF-SERVICE CAPABILITIES**
Empower users to initially claim their accounts and reset their passwords in RapidIdentity.

**SUPPORT FOR DUO AUTHENTICATION**
Leverage existing investments in Duo using the Duo Web SDK as an authentication method that can be enabled on an Authentication Policy.

**TAILOR EACH USER’S LOGIN EXPERIENCE FOR THEM**
Provide the right level of user experience and security by automatically assigning any combination of authentication methods based on that individual user’s needs, abilities, and risk-levels.

**PHISHING-RESISTANT MFA**
Leverage the World Wide Web Consortium’s open “Web Authentication” standard (WebAuthn), to provide unphishable authentication that leverages the device-level authentication and puts the organization on a path to passwordless authentication.

**MULTI-FACTOR AUTHENTICATION FOR WINDOWS AND VPN LOGIN**
Deploy the right mix of authentication factors, while providing your users with a fast, secure logon to their Windows devices and federated remote access solutions (VPNs, SSO portals, virtual desktop infrastructure, etc.) for your remote users.

**WIDE RANGE OF SECURE AUTHENTICATION METHODS**
RapidIdentity supports a broad selection of authentication methods so you can balance security, compliance requirements, and the needs of educators and their students:

- Push Authentication
- U2F Fido Tokens
- One Time Password: (soft token, SMS, email, and backup codes)
- Challenge Response Questions
- QR Code
- Pictograph
- Social Login
- Duo Authentication
- Password
- Federation
- Kerberos
- WebAuthn
