RapidIdentity Advanced
Product Training

Inhe RapidIdentity Advanced Training Course builds on our Foundations course by adding an in-depth, technical discussion and hands-on exercises. Participants will set up and configure the core RapidIdentity components and additional modules typically deployed in complex implementations. Advanced RapidIdentity adapters, like Web Services Application Program Interface (WSAPI) and Command Line Interface (CLI) integrations will also be included.

COURSE DETAILS

LOCATION

Courses are taught onsite at the Identity Automation Corporate Office or online via virtual format.

FORMAT

Instructor-led with guided hands-on lab exercises.

PREREQUISITES

Intermediate understanding of Microsoft Active Directory, LDAP, Database Management, basic programming and Conditional LogiC (e.g. if/else, for, do/while), Computer Networking, Web Services, and Internet Authentication Applications (e.g. SSH, RDP).

Completed RapidIdentity Foundations Pre-Assessment.

WHO SHOULD ATTEND

RapidIdentity Administrators, Partners, and Technical Support staff who wish to implement concepts covered in the Foundations course and use RapidIdentity to solve more complex identity, data, and access management challenges.

COURSE MATERIALS

Participants will receive access to a pre-configured, cloud hosted virtual environment in Amazon AWS to complete lab exercises.

COST

$1,500 USD per attendee.
